

Lean-to

The simple, affordable way to improve your home

Stylish and cost-effective, the Lean-to conservatory makes the best possible use of your available space, whilst providing a light and airy room for you and your family to enjoy all year round. Contemporary and minimalist, with clean aesthetic lines, the Lean-to creates a luxurious link between your house and garden at an affordable price.

Designed to run across the back of your home, the ends of your Lean-to design can be finished either vertically as gable ends, or be hipped back diagonally from one or both front corners.
